- B. The location of the project to be undertaken;
- C. The length of time for which the permit is needed;
- D. The type of debris that will be deposited in the container;

(4) Insurance: The company owning the container must provide proof of insurance to protect the City from defense cost and claims for damage for bodily injury, personal injury, including accidental death, and claims for property damage.

(5) Condition of Container: Containers must be well maintained and in good working condition, displaying the name and telephone number of the owner of the container, and be suitably supported at each contact point to prevent damage to paved surfaces. Containers must be covered when materials inside are easily airborne, pose a hazard, emit an odor or are otherwise offensive. Debris generated by the project must be placed inside the container and may not be placed on the public right-of-way or in any location where such debris interferes with the use of the public-right-way.

(6) Warning Required: (Minimum standards); The container must be reflectorized at all times. Reflectorized orange on white material shall be six inches in height and a minimum of thirty-six inches in length with the slash marks towards the traveled portion of the roadway. It shall be affixed to that part of the container such that approaching traffic can see the obstruction in the public right-of-way. Where traffic may approach from either side, the container should be reflectorized on both sides. Alternate to installation on containers: Type I or Type II Barricade in accordance with part VI of the Minnesota Manual on Uniform Traffic Control Devices.

The City shall not release a container from storage until all amounts due under this section have been paid.

(13) Effective Date: This ordinance shall be in full force and effect thirty (30) days after its publication in the Sauk Centre Herald.
