

# WATER HEATER REBATE PROGRAM

\$150 – \$350

**Purchase a new electric water heater, participate in SCPUC's load management program and you can receive a rebate.**

## Program Information

SCPUC cycles or curtails these water heaters at times when electrical usage is high. This program helps lower the peak electrical demand, which helps us keep rates stable and continue to offer low-cost energy. To qualify for the rebate, water heaters must meet the following criteria:

1. Must be an electric water heater with a minimum tank capacity of 50 gallons.
2. Must have an energy efficient factor of .92 or greater.
3. Must be connected to an energy control unit to cycle or curtail during peak loads.  
*(See terms and conditions on the back for a complete listing.)*

## Rebate Amounts

As a participant in the program, the customer may receive one of the following rebates, which will be applied directly to the customers' SCPUC account.

**50g or larger on cycling program: \$150**  
92% or greater efficiency factor

**80g or larger on curtailment program: \$350**  
92% or the federal standard efficiency factor

Upon the customer's purchase and installation of a qualifying water heater, SCPUC will install a load management controller free of charge. This will enable the water heater to be controlled by SCPUC during peak electric loads. **Cycling** allows the water heater to heat for short durations during peak times to maintain water temperature. **Curtailing** does not allow the water heater to heat during the entire peaking period. **If residence has central air conditioning, that will also be controlled and cycled for short durations. The air conditioner fan keeps moving the air. For further information, please contact SCPUC's office.**

After the application has been completed and the water heater and load management controller are installed, SCPUC will apply the rebate to your utility bill.

## Copy of sale's receipt required

Name: \_\_\_\_\_

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

SCPUC Account Number: \_\_\_\_\_

Brand of Water Heater: \_\_\_\_\_

Date of Purchase: \_\_\_\_\_ Purchased From: \_\_\_\_\_

Energy Factor (.92+): \_\_\_\_\_ Tank Size (50+ Gal): \_\_\_\_\_

Model Number: \_\_\_\_\_ Serial Number: \_\_\_\_\_

Presently on Load Management: YES NO Central Air Conditioner: YES NO

Signature: \_\_\_\_\_

## Terms and Conditions

- The water heater must meet all program criteria and be fully approved by SCPUC.
- The customer will agree to SCPUC's connection of load management equipment to the water heater and central air conditioner (if applicable) and participate in the program for a minimum of three consecutive years.
- The customer will permit SCPUC to periodically inspect the installation and to maintain the load management equipment. Unauthorized disconnection or removal of the equipment will result in the customer being billed the amount of the rebate.
- No other SCPUC sponsored incentive rates, rebates or credits are offered by or in conjunction with this program.
- **No connected water heater location nor customer at said location will be eligible for the program rebate more often than once during any 5 year period.**

### To be completed by office staff:

Copy of sales receipt

\$150.00/cycling

\$350.00/curtailing
